ST. MAURICE FORGES, C. E.—A small Village situated in a Valley, in the County of St. Maurice. Its importance is derived more particularly from its foundry for stoves made from iron collected on the spot. The River St. Maurice, on the border of which lie the Forges, is navigable some five miles above the works, to a place called the Gabelle Quarry, whence firestone is extracted, as also the limestone required for the smelting operations. The furnace yields from 4½ to 5 tons of metal a day, from bog-iron ore found, within a circuit of about six miles, on the surface of the ground, in layers of from six to eighteen inches in thickness. The works employ about 120 men. In the rear of the village lies Shawenegan, about 24 miles from Three Rivers, and 95 miles from Quebec; and at a short distance from Shawenegan are the Grand Falls of that name. THREE RIVERS, C. E.—The third City in the Eastern section of the Province, and Capital of the District of Three Rivers. It is situated on the North shore of the St. Lawrence, at the debouchure of the River St. Maurice, in the Seigniory of Ste. Marguerite and County of St. Maurice, and is equidistant (90 miles) from the Cities of Montreal and Quebec. The law courts for the District are held here, presided over by a resident judge. Three Rivers is the seat of a Roman Catholic bishop; and the Cathedral, recently erected, is one of the finest edifices in British North America. The improvement of the River St. Maurice by the Government, in 1853, has given additional impetus and life to Three Rivers; about $200,000 having been expended in erecting booms and slides on the river, which has already attracted the investment of more than $1,000,000 in lumber operations. The source of supply of lumber furnished by the St. Maurice and its tributaries extends over a territory of about 50,000 miles. The St. Maurice Lumber Company, chiefly composed of Americans, have erected extensive steam saw mills and machine shops, at the mouth of the St. Maurice, at which they manufacture a large amount of lumber, chiefly for the American market. The "Grès Mills," the property of G. Baptist, Esq., situated nineteen miles up the St. Maurice, also turn out large quantities of lumber yearly. There are numerous other saw mills of minor note; this place being the depot whence the whole is shipped, to Quebec, England, the West Indies, and the United States. Three Rivers has been a Port of Entry for some years past, and goods are bonded here if necessary. The steamers from Montreal and Quebec touch at Three Rivers nightly; the time of travel averaging about five hours. The usual cabin fare is $1.25. A steamer plies semi-weekly between Three Rivers and Montreal; and another, semi-weekly, between Three Rivers and Quebec. Extensive iron works are in constant operation in the vicinity of the City. The chief are the works known as the Radnor, St. Maurice, and Islet. Large quantities of excellent railway wheels have been recently cast at the Radnor works for the Grand Trunk Railway; and the castings of the St. Maurice are justly celebrated throughout the Province. Brickmaking is also extensively carried on in the vicinity; and the place affords every facility for shipbuilding. A bank, under the Free Banking Act, is in course of organization; and the Banks of Montreal, Upper Canada, and Quebec, have agencies here. There are four efficient fire companies and a company of volunteer rifles; and a company of volunteer artillery in course of organization. There is a Mechanics Institute, a reading room, and several first-class educational establishments. The causes that have hitherto militated against the development of the numerous resources of the District,—namely, the lack of railway communication, and the extent of impracticable navigation of the St. Maurice in rear of the City,—the Government has taken measures to remove: the recent enactments for the relief of the Grand Trunk Railway provides for a branch road connecting Three Rivers with Arthabaska; thus opening a direct communication with five New England States, all requiring lumber, and Three Rivers being the nearest and cheapest market whence they could obtain it: as also another Act of last session provides for the construction of a branch from Three Rivers to the Grand Piles on the St. Maurice, whence the river is navigable seventy miles further. This road will be a great boon to lumbermen, and facilitate the settlement of the country. The famous Falls of Shawenegan, second only to those of Niagara, are twenty-four miles from Three Rivers, and those of the Grand Mère thirteen miles further up the St. Maurice. Mail daily. Population about 7000.

TORONTO, C. W.—The Metropolis of Upper Canada, is situated on the north-west shore of Lake Ontario, facing a very spacious Bay, or beautiful sheet of water, somewhat oval in form. The City is laid out in the form of a parallelogram, with singular regularity, the streets intersecting each other at right angles. Owing to the banks of the Lake being low and the site of the City rather flat, Toronto presents at a distance no striking aspect from any of its approaches. On nearing it from the Lake, however, it gradually unfolds itself, till, passing through the narrow entrance of the Harbor and steaming up the Bay, the Provincial Lunatic Asylum, Trinity College (Episcopal), the Parliament Houses, and other buildings come full into view. The domes and spires of the churches and public buildings in the background, give the City a very picturesque and imposing appearance. When finished, the projected Esplanade will greatly improve the front view from the Lake and Harbor (which it encroaches upon and faces), and, with its lines of quays and parallel lines of railway, will present a striking and animated scene. King and Yonge are the two principal streets: the former runs parallel with the Bay and the latter, intersecting it, extends northward, through a rich and prosperous agricultural country, forming a sort o irregular village of upwards of thirty miles in length. King—the Oxford street or Broadway of Toronto, a very long, straight, and spacious street, with its broad sidewalks, and many handsome, well-filled shops—is the fashionable business resort, the great thoroughfare and promenade. The public buildings of the City are very numerous, and many of them extremely handsome; such, for instance, as the new General Hospital, St. James's, St. Michael's, Zion, and Knox's Churches, the City Hall, St. Lawrence Market, Nordheimer's Music Hall, the Exchange, Mechanics' Institute, Post Office, City Schools, several of the Banks, the Rossin House, &c.; and especially the Normal and Model Schools,—a spacious edifice, whose organisation and methods of instruction, though not long established, have produced a most beneficial change in academical government and tuition, which is rapidly making itself felt for good throughout the whole Province. Osgoode Hall, the seat of the Superior Courts of Law and Equity for Upper Canada, situated on Queen street, nearly opposite York street; the University of Toronto, and University College, standing retired amid the sequestered retreats of the University Park, are noble edifices. The University Park, with its Avenues to Queen and Yonge streets, and the Normal School grounds, beautifully laid out and planted, are places where all may freely go for tranquil walks and needful recreation. The Provincial Magnetical Observatory is also situated in the University Park, and is one of the meteorological stations established by the British Government, at the request of the Royal Society of England, in 1840. It is now attached to the University of Toronto. Its position is as follows: Latitude 43° 39.4 North, Longitude 79° 21.5 West, or 5 hours 17 minutes 26 seconds slow of Greenwich time. Toronto is at present the seat of the Provincial Government; and the several public Departments are located here. It has many industrial establishments, some of them extensive,—including foundries, tanneries, a great variety of other factories, and some very fine milling establishments,—which are thriving, and rapidly extending and improving their productions. Her spacious land-locked Harbor, easy of access to the largest craft that navigate our inland waters, and perfectly sheltered by the bar which faces it and keeps out the Lake, affords the utmost facility for any possible extension of business or trade. Connecting, as it does, at all seasons of the year, with almost every place of importance in Canada and the United States (seaboard as well as inland),—by means of the Grand Trunk, Great Western, Northern, and their connections; and by navigation, during summer, besides,—the future of Toronto cannot but be prosperous. Thanks to her steady energy and enterprise, no less than to her centralized position, she is already reaping the first-fruits of her new connections in an extending trade,—a steady prosperity which seems destined to be both durable and progressive. Distant from Niagara Falls 50 miles, Collingwood 93 miles, Hamilton 45 miles, London 114 miles, Kingston 165 miles, Montreal 333 miles, New York 500 miles, Boston 593 miles. Toronto returns two Members to the Provincial Parliament. Population about 50,000, and rapidly increasing. Value of assessed property in 1856, $28,532,300; value of imports $7,500,000, exports $1,500,000.—Toronto, formerly called York, was founded, in 1794, by Lieut. Governor John Graves Simcoe.

THE UNIVERSITY OF TORONTO.

The University of Toronto was established by Royal charter in the year 1827, under the title of "King's College," and in the year 1828 was endowed by patent, with a grant of the lands which had been set apart by the Crown for that purpose. It was opened in the year 1843, and its first Convocation took place in the year 1844. In the year 1853, the rights and privileges of the Convocation, as guaranteed in the original charter, were abolished by Act of Parliament. Under this present Act the University is modelled after the University of London, Eng., and is governed by a Senate appointed by the Crown. Such great additional public benefits have lately been afforded by the Post Office Department that no apology is necessary for furnishing such statistics as will show the advance the Country has made in perfecting one of the best means of civilisation. No labored arguments are required to satisfy the meanest capacity that the quickening, cheapening, and facilitating of Postal communications, whether in the form of Letters or printed literature, which we now enjoy, must tend to improve our morality as a nation, ameliorate our social condition, establish our commerce, and advance our political status among the nations of the earth.

The following valuable Tables and accompanying explanations have been extracted from the Postmaster General's latest Report, and they afford abundant evidence of the admirable management of the whole Department entrusted to his charge.

To shew the progressive growth of the Department from year to year, the following Table, brought up to the year 1856, will be interesting:—

The available Postal Revenue of the year was, as above shewn.....	£93,573	17	7½

As compared with the collections of the preceding year, there was an increase of £1532 7s. 7d., notwithstanding that by the Act which took effect on the 1st July, 1855, and therefore operated on three Quarters of the year included in this Report, the postages heretofore chargeable on the correspondence of the Legislature and of the Public Departments, and the remaining charges on the transmission of Canadian Newspapers by Post, were abolished, and these items of Revenue consequently withdrawn from the resources of the Department.

If an equivalent for the sum which those branches of income yielded be deducted from the corresponding three Quarters of the year ended March, 1855, in which they formed part of the receipts, it will be found that the remaining items of Postal Revenue, consisting almost exclusively of the ordinary correspondence of the Country, had in fact improved within the year ended March, 1856, to the extent of £12,000,—a very satisfactory rate of increase, and full of promise for the future.

The accounts of the year 1856, as compared with 1852, shew that the —

Ordinary Letter Postage has increased	12¾ per cent.	Charge for Salaries, City Post Office Establishment	17½ per cent.
Charge for Salaries, Post Office Department	10½ do	Do do Other than City Post Offices	10¾ do
Charge for Salaries, Inspector's Branch	11⅜ do	Total Salary and Commission Charge	13⅔ do

It should be noticed that the total charge includes the Salaries of Railway Clerks, a comparatively new class of Officers created by the exigencies of the Railway Mail service.

The month of May, 1856, was marked by the first voyage to the St. Lawrence of the line of Canadian Mail Steamers, under the contract between Mr. Hugh Allan of Montreal and the Provincial Government. These vessels have performed the service for which they were bound with laudable punctuality, and have crossed the Atlantic at an average speed which compares successfully with the performances of the steamers of the Cunard and Collins lines from New York and Boston.

The comparative yearly issue of Postage Stamps from the first introduction of this mode of prepayment has been as follows:—

Ditto 1854	3295	12 6
Ditto 1855	5770	15 0
Ditto 1856	6071	15 6

The Dead Letter statistics of the year are,—

Provincial Dead Letters	110,915
Originating in the United Kingdom and transmitted unopened to the G. P. O., London	14,443
Ditto in the United States, transmitted unopened to Washington	28,540
Total number of Dead Letters on number of letters passing through the Post for delivery in Canada	153,898
Received from Washington, Dead Letters originating in Canada and of which delivery in the United States had failed	30,648
Ditto from the General Post Office, London, Dead Letters originating in Canada and undelivered in U. Kingdom	3,659

The number of Letters passing through the Post under the Registration system commenced in May, 1855, is very great and rapidly increasing. During the year ended May, 1856, the number was 350,000; and now in February, 1857, upon a recent esimate, the computation was taken to be at the rate of 450,000 per annum. Of the 350,000 letters registered last year, question of failure from all causes attached to 35 only, and the integrity and careful attention to the duties connected with registered Letters involved in this result is highly creditable to the Postmasters and Clerks of the establishment.

The increase in the general circulation of Canadian Newspapers by Post, in the period which has elapsed since the Act of 1855 granted an entire exemption from postage charge, has been very remarkable: other causes have doubtless been actively at work to stimulate the extension of newspaper circulation in the Province, but it is worthy of observation that this expansion has been at least coincident with the abolition of postage charge. It is estimated that the annual rate of newspaper transmission by Post is now not less than twelve millions of copies. When the last newpaper enumeration was taken in 1853 the number was found to be about six millions.

The sections of the Grand Trunk Railway lying between Brockville and Toronto became available for Mail transport in October, 1856, and thus, by uniting at Toronto with the Great Western, completed the line of Postal communication by Railway between Quebec in the east and Windsor in the extreme west. This therefore appears to be an appropriate time to draw attention to the effect of this change in the mode of transport, in the acceleration of the Mails, especially in the winter season; and the following comparative statement will shew what the time occupied in the conveyance of a letter was in winter only four years since between Quebec and some of the principal cities and towns to the westward, and the present course of Post by Railway mail:—

	In 1853.	In 1857.		In 1853.	In 1857.

The Money Order System, initiated in Canada, in February, 1855, has worked satisfactorily since the Report of last year, and the business transacted has been gradually assuming larger dimensions.

6.—Postmasters must be careful with regard to letters posted at their offices for any of the countries or places named in the above lists,—

1. Whether sent prepaid or unpaid, to mark the sterling rate only; thus, "9d. sterling," or, "Paid 9d. sterling."
2. To mark the rate, if unpaid, in black, and, if prepaid, in red ink; this difference of color being held in the practice of the British and Foreign Post offices to afford evidence of the fact of a letter being prepaid or otherwise.
3. In the cases where pre-payment is not optional, to warn parties offering letters, that such letters cannot go forward unless prepaid.
4. When a letter for a place to which letters cannot be forwarded unpaid is dropped into a Post office letter-box without pre-payment, to note the fact thus, "Postage not paid," upon the back of the letter, and put it under cover to the Postmaster General by the first post.

7.—Attention is requested to the note placed at the head of each list, warning that the rates given are calculated for the transmission by the Canadian mail steamer line direct from the St. Lawrence; and that when letters for the places indicated are forwarded in the mails sent to England by way of the United States, whether for a British or Canadian steamer, they will be liable to an additional rate, to cover the American transit charge, of 2d. sterling per half oz. Thus a letter for France weighing not exceeding a quarter of an oz., if sent by Canadian steamer from Quebec will be liable to a charge of 8d. sterling, and if by mail for a Cunard steamer from New York or Boston, or for a Canadian steamer from Portland, to 10d. Sterling.

REGISTRATION OF LETTERS.

Persons transmitting letters, which they desire should pass through the post as "registered letters," must observe that no record is taken of any letter unless specially handed in for registration at the time of posting. Upon all such letters, with the exception of those addressed to the United States, one penny must be prepaid as a registration charge. If addressed to the United States, the ordinary postage rate on the letters to that country *must be prepaid*, and in addition a registration charge of 3d. per letter. The registry thus effected in Canada will be carried on by the United States Post office until the letter arrives at its destination.

In like manner, letters addressed to Canada may be registered at the place of posting in the United States, and the registry made there will accompany the letter to the place of delivery in Canada.

A certificate of registration will be given by a postmaster if required.

The registration system can be applied to the letter portion of the mail only. Should a book, periodical, newspaper, circular, or other printed matter, be offered for registration, the benefit of the system cannot be extended to it unless it be *prepaid* the full rate of postage to which it would be liable according to weight as a letter, in addition to the ordinary registration fee.

It must be distinctly understood by parties who avail themselves of the privileges of registration, that such registration, with the certificate and receipt, are merely intended to afford the means of tracing the course of such letters through the post, and of ascertaining their delivery at destination, and will not be held to imply any liability on the part of the Postal Department to make good any loss, or alleged loss, arising upon the miscarriage of any such letter or its contents.

SOLDIER'S AND SEAMENS' LETTERS.

Letters addressed to non-commissioned officers may be forwarded from Canada via Canadian mail steamers from Quebec, or via Quebec and Halifax, on payment of one penny at the time of posting, provided that the letter does not exceed half an ounce in weight.

POSTAGE ON NEWSPAPERS AND PERIODICALS.

NEWSPAPERS.

All newspapers printed and published within this Province, *and addressed from the office of publication*, are transmitted from the Post office where mailed by the publisher, to any other Post office in Canada, or to the United Kingdom, or to any British Province, Colony, or Possession, or to France, or the United States, free of *Canadian postage*.

Newspapers printed and published in the United Kingdom, or in any British Province, Colony, or Possession, or in France, when received in mails addressed to this Province, are delivered at the Post office to which they may be directed in this Province free of *Canadian postage*.

Newspapers received in the ordinary mails from the United States are charged one half-penny each on delivery in Canada, with the exception only of "*exchange papers*" addressed to the editors or publishers of Canadian papers, which pass free.

Newspapers, whether printed and published in Canada, the United Kingdom, or elsewhere, when posted or brought into Canada, otherwise than as provided in the foregoing clauses, or when re-mailed in Canada, including all *transient papers*, may be forwarded on prepayment of one half-penny each *by postage stamp*; but, unless so prepaid, papers so posted or re-mailed cannot be forwarded.

The class of *transient papers* liable to prepayment by newspaper postage-stamp includes all newspapers posted in Canada otherwise than from the office of publication.

Newspapers addressed from Canada, to be transmitted by way of England to foreign states or countries beyond sea, and newspapers received from such states or countries through the same channel, are liable to the special rates of charge prescribed by the Imperial Post office.

The British Post office requires that an Imperial postage rate of one penny sterling each be prepaid on all newspapers sent from Canada through the Imperial posts, to British West Indies, India, Australia, the Cape of Good Hope, and other British Colonies and Possessions beyond Sea; and in addition to this penny, whenever any such paper is forwarded from Canada, by the British closed mail through the United States, the prepayment of a second penny is necessary to cover the American transit rate.

Therefore, when intended to be forwarded by the ordinary closed mails through the United States, transient newspapers for the destinations named must be prepaid—3d. currency each; and when sent by the Provincial overland route, *via* Halifax, or by Canadian mail steamer from Quebec, 2d. currency.

Transient newspapers for the British West Indies or Newfoundland must be prepaid, by stamp, 2d. currency each.

Canada to England (Cunard line) 1d. on delivery.
Do do (Canadian line) 1d. on delivery. } If *transient*, to be prepaid a halfpenny stamp.

Newspapers from the United Kingdom received in Canada in the closed British mails *via* the United States, though free of Canadian charge, are liable to a rate of one penny each on delivery—representing a transit charge due to the United States on every paper so received.

If received *via* the Canadian line they are delivered free.

Publishers of newspapers and periodicals may send, free of postage to their subscribers, subscription accounts, and receipts for the same, included in their publication.

It is declared by the Act that the word "newspaper" shall be held to mean periodical prints published not less frequently than once in each week, and containing notices of passing events.

PERIODICALS, MAGAZINES, AND OTHER PRINTED MATTER.

Periodicals *printed in this Province* other than newspapers, when specially devoted to *religious* and *general education*, to *agriculture*, to *temperance*, or to *any branch of science*, and addressed directly from the office of publication, are transmitted from the Post office where mailed, to any other Post office in this Province, free of postage.

Periodicals *other than such as are exempt under the preceding clause* are liable to the following rates of charge; namely, if not exceeding 3 oz. in weight ½d., if over 3 oz. 2d.

Transient periodicals posted in Canada must be prepaid by postage-stamp. This class includes all periodicals of whatever description posted otherwise than from the office of publication.

Printed circulars, prices current, or hand bills, and other printed matter of a like description, and books, bound or unbound, passing as above, will be charged a rate of one halfpenny per ounce or fraction of an ounce, whether sent singly or in packets to one address, under the weight limit of 4 lbs. per packet.

Bound volumes of any periodical or newspaper published in Canada, if bound in a form to come within mailable dimensions, that is to say, not exceeding two feet in length, breadth, or thickness, nor four pounds in weight, may be sent from the office of publication to any place in Canada, at a charge of one penny per 8 oz., or fraction of 8 oz.; and this rate will apply to such volumes, whether the separate numbers of the publication or paper be free from postage or otherwise. Also, packets unbound of such periodicals or papers may be returned by a subscriber to the office of publication, at the same rate of charge, viz., 1d. per 8 oz.

Prepayment of the foregoing rates on periodicals and circulars and all other printed matter will be optional, except when addressed to the United States or British West Indies; and in such cases the charge must invariably be prepaid. Further, on all such printed matter *received* from the United States and British West Indies, the Canada rate will always remain to be collected by the delivering postmaster in this Province.

Circulars and other printed papers must be sent unsealed to pass as such; and pamphlets, periodicals, magazines, books, &c., must be put up in covers open at the ends or sides, so that the character of the matter may be seen, and are subject to the same restrictions as to the presence of writing and penalty of letter postage for infringement of regulations, which are hereinbefore detailed as applying to newspapers.

POSTAGE STAMP FOR PREPAYMENT OF NEWSPAPERS, PERIODICALS, DROP LETTERS, &c.

To supply a medium for the prepayment of transient newspapers and periodicals, and of drop or town letters, a postage stamp bearing postage value at *one halfpenny* each, is supplied to postmasters, for sale to the public at all the principal Post offices. Though specially intended for the lesser rates of postage charge, these stamps, if affixed to a sufficient amount, will prepay ordinary letters.

Periodicals when sent in packets to one address, within the limit of 4 lbs. to each packet, will pass at the rate of 3d. per lb. or fraction of a lb.

BOOK POST WITH ENGLAND.

The Rates and Regulations are as follows:—

1. A book packet may contain any number of separate books, publications, works of literature or art, almanacs, maps or prints, printed letters, and any quantity of paper, vellum or parchment (to the exclusion of written letters whether sealed or open); and the books, maps, paper, &c., may either be written, printed or plain, or any mixture of the three, and may be either British, Colonial, or Foreign.

2. The name and address of the sender, or anything else not in the nature of a letter, may also be written or printed upon the envelope or cover of the packet, in addition to the name and address of the person to whom it may be forwarded.

3. All legitimate binding, mounting, or covering of the same, or of a portion thereof, will be allowed as part of the packet, whether such binding, &c., be loose or attached, as also rollers in the case of prints and maps, and whatever may be necessary for the safe transmission of literary or artistic matter, or usually appertains thereto, and the postage is to be rated upon the gross weight of the packet.

4. The rates of postage on such book packets are,—

For a packet not exceeding 4 oz. in weight								3d. Stg.,			4d. Cy.
"	"	exceeding 4 oz. and not exceeding ¼ lb						6d.	"		7½d. "
"	"	"	¼ lb.	"	"	1 lb	1s.	0d.	"	1s.	3d. "
"	"	"	1 lb.	"	"	1½ lbs.	1s.	6d.	"	1s.	10½d. "
"	"	"	1½ lb.	"	"	2 lbs	2s.	0d.	"	2s.	6d. "
"	"	"	2 lbs.	"	"	2½ lbs	2s.	6d.	"	3s.	1½d. "
"	"	"	2½ lbs.	"	"	3 lbs	3s.	0d.	"	3s.	9d. "

And so on, increasing 6d. sterling for each additional half pound or fraction of half a pound.

5. The following conditions must be carefully observed, as prescribed by the Imperial Post office :—

Every book packet must be either without a cover or in a cover open at the ends or sides.

It must not contain any written letter, open or sealed, or any sealed enclosure whatever.

No packet must exceed two feet in length, breadth, or width.

The postage of book packets must be paid in advance by postage stamp.

Should a book packet be posted unpaid, or with a prepayment of less than 3d., or be enclosed in a cover not open at the ends or sides, or should it exceed the dimensions specified, such packet cannot be forwarded, and must be sent to the Dead Letter Office. But when a book packet shall have been posted and insufficiently prepaid, and it shall appear that the single rate of 3d. sterling at least has been paid, such packet is to be forwarded, charged with an additional postage equal to the deficiency, with another single rate as a fine.

Should any letter, whether sealed or unsealed, or any enclosure, sealed or otherwise closed against inspection, be found in a book packet, such letter or other enclosure is to be forwarded, charged as an unpaid letter, with an additional sum of 6d. by way of penalty. The packet itself is, however, to be forwarded at the ordinary book charge.

6. Printed votes and proceedings of the Imperial Parliament and Colonial Legislatures are subject to the above charges and regulations when sent by book post between Canada and the United Kingdom.

7. All book post matter intended to be sent to the United Kingdom from Canada must be forwarded upon Quebec for transmission either *via* Halifax, or, in summer, by Canadian steamer.

Books cannot be forwarded except at letter postage rates by the mails sent to England through the United States.

BOOK POST WITH FRANCE.

Under an arrangement concluded between the British and French Governments, provision is made for the transmission through the British mails between Canada and France, and between Canada and certain foreign countries hereinafter named, through France, of printed papers of every kind, whether newspapers, prices current, periodical works, stitched or bound books, pamphlets, sheets of music, catalogues, prospectuses, announcements or notices of various kinds, and whether printed, engraved, or lithographed, at the following rates of charge :—

					British and French Charge combined.				
For a packet of such printed matter, or single newspaper, book, pamphlet, &c., not over 2 ounces in weight.....					2d. Stg., equal to	..		2½d.	Cy.
For ditto, exceeding 2 ozs. and not exceeding 4 ozs.....					4d. "	do	..	5d.	"
"	"	4 ozs. and not	"	8 ozs	8d. "	do	..	10d.	"
"	"	8 ozs. and not	"	1 lb .....1s.	4d. "	do	..	1s. 8d.	"
"	"	1 lb. and not	"	1½ lb .....2s.	0d. "	do	..	2s. 6d.	"
"	"	1½ lb. and not	"	2 lbs .....2s.	8d. "	do	..	3s. 4d.	"

And so on increasing 8d. sterling (equal to 10d. currency) for each additional half pound in weight.

Prepayment will be optional, except when such printed matter is addressed *via* France to Spain.

On transient papers and periodicals prepayment by stamp of a halfpenny each is required.

The above postage rates comprise the whole British and French charge; and as no Provincial rate will be imposed, there will be no further charge when such printed matter is forwarded by the Canadian line of mail steamers, or by way of Quebec and Halifax, Nova Scotia, and by the fortnightly British steam packets between Halifax and Liverpool; but when forwarded or received in the ordinary weekly mails to and from England *via* the United States, there will be a transit charge payable to the United States, and in addition to the above rates, of 1d. currency for each newspaper, without reference to weight, and of 5d. sterling, equal to 6¼d currency, per ounce, for printed papers other than newspapers. This United States transit rate on printed matter for and from France, conveyed by that channel, must always be collected and accounted for by the Canada Post office, as well on the delivery here of such printed matter when received as at the time of posting when sent from Canada.

The book postal regulations between Canada and Great Britain apply also to matter between Canada and France.

If any of these regulations be disregarded the packets will either be detained by the British Post office or forwarded charged as unpaid letters.

List of countries and places embraced in this arrangement :—

France and its dependencies (Algiers, &c.).

French offices in the Levant, viz., Alexandria, Alexandretta, Beyrout, Constantinople, Dardanelles, Gallipoli, Jaffa (Syria), Latakia (Syria), Messina (Turkey in Asia), Mytelene, Rhodes, Smyrna, Tripoli (Syria).

Baden, Bavaria, Greece, Lucca, Majorca, Minorca, Modena, Papal States, Parma, Placentia, Sardinia, Two Sicilies, Spain, Switzerland, Syria, Tripoli, Tunis, Tuscany, Venetian Lombardy, Wurtemburg.

NOTE.—Printed papers addressed to these countries are forwarded as a rule through France.

GENERAL OBSERVATIONS.

Addresses upon all mail matter for Canada should express the name of the Post office from which it its intended that the letter or package should be delivered, and care should also be taken to give the designation of the township or county in which such Post office may be situated.

It is also desirable that the Christian as well as surname of the person addressed should be given.

Addresses should be carefully and distinctly written.

Before mailing a letter for British colonies beyond sea or for Foreign countries, the writer should satisfy himself as to whether prepayment to destination be optional or not.

MONEY ORDER SYSTEM OF CANADA.

I. Money Order Offices are divided into FIRST and SECOND Class.

II. Both classes may draw for any sum on one Order up to £100 upon FIRST Class Offices, and for any sum up to £50 on one Order upon SECOND Class Offices.

III. When Money Orders exceeding £25 in aggregate amount are issued in one day, and to the same person by one or more Offices, upon a Second Class Office, the Postmaster of the Office drawn upon will be at liberty to defer the payment of such Orders for three days.

IV. The Money Orders shall be made out upon Forms supplied by the Head Office, *and no Order will be valid or payable unless given upon the regular Printed Forms.*

V. Persons applying for Money Orders will be required to state the particulars upon a Form of Application provided for that purpose.

VI. If, in consequence of error or misapprehension in giving the name of the place of payment of a Money Order, the purchaser should desire to have the same changed, the issuing Postmaster will take back the first Order and issue another, for which he will charge commission, as on a new transaction.

VII. When a mistake in the name of the Payee, or person who is to receive the Money, has been made by the Applicant for a Money Order, the erroneous Order may also be taken back, and a new one granted, for which a second commission will likewise be exacted.

VIII. Parties procuring Money Orders will please to examine them carefully, to see that they are properly filled up and stamped. This caution will appear sufficiently important when it is understood that an Order defective in any important respect will throw difficulties in the way of its payment.

IX. When a Money Order is presented for payment at the Office on which it is drawn, the Postmaster, or Clerk employed, will use all proper means to assure himself that the Applicant is the party named and intended in the advice; and upon payment of the Order will be careful to obtain the Signature of the Payee to the Receipt at foo

X. When through illness, or other insuperable difficulty, the Payee is prevented from presenting the Order in person, the Postmaster will be at liberty to accept a written order on the back in favour of a second person, provided always that such written order is satisfactorily proved to be genuine.

XI. Any Money Order Post Office may repay an order issued by itself, but only to the party who obtained it. The charge or commission, however, shall not in any case be refunded.

XII. The charges or commissions for Orders will be as follows:—

Under and up to £2 10s.					3d.	Over £20	0s.,	not exceeding £22	10s.	2s.	3d.
Over £2	10s.,	not exceeding £5	0s.		6d.	do 22	10s.,	do 25	0s.	2s.	6d.

It is hoped that the foregoing description of Routes through Canada and their connections with those in the United States, with the following Table, will not only be deemed sufficiently explicit for the general traveller, but that it will especially serve as a protection to the strangers who annually land on our shores from the very serious mistakes to which their ignorance of the country renders them liable. They will not fail to observe that throughout these Routes and Table the Port of Quebec is assumed as a starting point; that the first three columns of the Table express the exact situation of any place in Canada which may happen to be their destination, and to which it should be their first object to proceed on their debarkation at Quebec; and that the last column shows the nearest point most accessible by Railroad or Steamboat. The importance of a correct knowledge in this respect may be seen from the fact, that an unnecessary travel of twenty miles by stage or by a specially hired vehicle would probably cost an immigrant family nearly as much as the whole of their inland transport besides, In cases where the Main Routes run in a parallel direction, or to the same terminus, it has not been thought proper here to exhibit any preference; but rather to leave each immigrant to decide for himself, according as he may be governed by the value of his time, the amount of his means, and his other peculiar circumstances. It should, however, be observed that No. **14** is a cheap but tedious Route, and is, therefore, chiefly used in cases requiring the transport of families or considerable baggage: persons unincumbered in these respects generally prefer to travel by the regular stages from Brockville and other points convenient to destinations on the route of the Rideau River and Canal.

TABLE

SHOWING THE PROXIMITY OF THE RAILROAD STATIONS AND LANDING PLACES TO THE CITIES, TOWNS, AND VILLAGES OF CANADA.

The Letter or Figure after the Names, in the Fourth Column, shows the Route in which the Place is to be found. The Places printed in italics, in the Second Column, are Seigniories, Fiefs, or Baronies.

CURRENCY AND LEGAL TENDER.

The Act 16 Vict., cap. 158, repeals all former Acts regulating the Provincial Currency, and enacts that the denominations of money shall be pounds, dollars, shillings, pences, cents and mills, but that the public accounts of the Province shall be kept in such denominations as Her Majesty shall from time to time direct. Provision is thereby made for the striking and issuing from the Royal Mint of silver coins with such names as shall be assigned to them by Her Majesty in her royal proclamation declaring them lawful money of the Province of Canada; but until the issue of such proclamation, the silver coins of the United Kingdom shall pass current in Canada, and no other silver coins shall be legal tender or current money in the Province.

The amount of silver and copper as a legal tender is limited,—the former to the amount of ten dollars, and the latter to one shilling or twenty cents.

The gold coins of the United States of America are also declared a legal tender, at the following rates, viz:—

Eagle coined before July 1st, 1834, and weighing 11 dwts. 6 grs., at $10.66⅔ or £2 13s. 4d.; half eagle of like date, and proportionate weight, one half the above sum, i. e. $5.33⅓ or £1 6s. 8d.; eagle coined after July 1, 1834, and before January 1, 1852, or afterwards, under the same standard of fineness, and weighing 10 dwts. 18 grs., at $10 or £2 10s.; and the multiples or halves of the said eagle for proportionate sums.

Any or all of any other gold coins of the United States of America, or of any other foreign nation or state, may by proclamation be declared current and a legal tender in Canada, at rates to be thereby assigned to them.

No such proclamation has issued since the passing of the above Act.

By a subsequent Act, 20 Vict., cap. 18, all accounts with the Government and of its various Departments are required to be kept, from the commencement of the year 1858, in dollars and cents.

All the Banking Institutions of Canada have, since the passing of this Act, publicly announced their intention of keeping their accounts in those denominations from the above date.

EXTRADITION OF OFFENDERS TO OR BY THE UNITED STATES OF AMERICA.

By the 10th article of the treaty between Her Majesty and the United States of America, commonly called the "Ashburton Treaty," signed at Washington August 9, 1842, and ratified October 30, 1842, it is agreed that "Her Majesty and the United States shall, upon requisition made by either of them or their ministers, officers "or authorities respectively, deliver up to justice all persons who, being charged with the crime of *murder*, or "*assault with intent to commit murder*, or *piracy*, or *arson*, or *robbery*,* or *forgery*, or the *utterance of forged paper*, "committed within the jurisdiction of either of the high contracting parties, shall seek an asylum or shall be "found within the territories of the other; provided that this shall only be done upon such evidence of criminality as, according to the laws of the place where the fugitive or person so charged shall be found, would "justify his apprehension and commitment for trial, if the crime or offence had been there committed; and "that the respective judges and other magistrates of the two Governments shall have power, jurisdiction and "authority, upon complaint made under oath, to issue a warrant for the apprehension of the fugitive or person "so charged, so that he may be brought before such judges or other magistrates respectively, to the end that the "evidence of criminality may be heard and considered; and if, on such hearing, the evidence shall be deemed "sufficient to sustain the charge, it shall be the duty of the examining judge or magistrate to certify the same "to the proper executive authority, that a warrant may issue for the surrender of such fugitive; and that the "expense of such apprehension and delivery shall be borne and defrayed by the person making the requisition "and receiving the fugitive."

To facilitate the working of the above treaty, an Act was passed by the Congress of the United States on the 12th August, 1848, (cap. 167 of 1st sess. 30th Congress,) and a similar one by the Legislature of Canada on 31st May, 1849, (12 Vict., cap. 19,) by which Acts it is provided that the justices and judges of the United States and State courts, and commissioners authorized by the United States courts, (and in Canada, the judges of the superior courts and the justices of the peace,) may issue warrants for the apprehension of any person charged with having committed, within the limits of the foreign Government, any of the crimes enumerated and provided for by that treaty. If, on hearing, the evidence be deemed sufficient to sustain the charge, the same shall be certified with a copy of the testimony to the *Secretary of State*, (in Canada, to the *Governor*,) that a warrant may issue upon requisition from the proper authority for the surrender of such offender.

2d. Copies of the depositions upon which original warrant may have been granted in the foreign country may be received in evidence.

3d. The Secretary of State (*in Canada*, the Governor) may, under his hand and seal, order such offenders to be delivered to such person or persons as may be authorized by the foreign Government to receive them.

4th. Persons committed with a view to extradition, and not delivered up and conveyed out of the country where detained within two months of the commitment, may be discharged out of custody by any judge of the United States or State courts, (*in Canada*, by any of the judges of the Superior court,) unless sufficient cause for further detention be shown.

The objects for which money may be raised on the credit of the Lower Canada Municipal Loan Fund, are *limited* by the second section of the 16th Vict., cap. 22, as amended by the 18th Vict., cap. 13, sect. 4, and the 20th Vict., cap. 42, as follows:—

By the 16th Vict., cap. 22, sect. 2, the Corporation of any County, City, Town, Township, or Village, is authorized to effect a loan—

To defray the expense of building or improving any *gaol* or *court house* for the use of the municipality;

For acquiring, making, constructing, or completing, or assisting in the making, construction, or completion of any *railroad*, *canal*, or *harbour*, or for the improvement of any *navigable river* within or without the municipality, but the acquisition, making, or construction whereof will benefit the inhabitants of the municipality.

By the same authority, the Corporation of any City or County, may effect a similar loan—

To defray the cost of making or improving any *bridge*, *macadamized*, *gravel*, or *planked road* within or without the municipality, but the making or improving whereof will benefit the inhabitants of such municipality.

By the By-laws to be made by any Municipality as above authorized, it may be provided that the assistance of the Municipality shall be granted towards—

Making, constructing, or completing any such *railroad*, *bridge*, *macadamized*, *gravel*, or *planked road*, *canal* or *harbour*, or towards the improvement of any navigable river, *either* by *subscribing* on behalf of the municipality for stock in any company incorporated for making, constructing, or completing the same, or by *loaning money* to such company, or to any board of commissioners incorporated for any of the above purposes.

By the 18 Vict., cap. 13, sec. 4, any incorporated City, Town, or Village, may effect a similar loan—

To defray, or aid in defraying, the expense of erecting, prosecuting, and maintaining any *gas* or *water works* within or for the use of such municipality, or its *drainage*, *salubrity*, or *more perfect sanitary condition*, or for constructing or aiding in the construction of any *plank* or *macadamized* road, for the benefit of such municipality.

By the 20 Vict. cap., 42, the objects of such loans are further extended.

I. The provisions of the Acts 16 Vict., cap. 22, and 18 Vict., cap. 13, shall be interpreted as applying and having always applied to all *local municipalities* in *Lower Canada*, in the same manner and to the same extent as to *township municipalities* in *Upper Canada*.

II. The corporation of any municipality whatever in Lower Canada, in addition to the powers already conferred upon them by the above Acts, may, by conforming to the provisions thereof, in so far as they are consistent with this Act, raise upon the credit of the share of the said fund set apart for Lower Canada, any sum of money which they may deem necessary for the *opening*, *establishment*, *construction*, *repair*, or *improvement*, either within or without the limits of the municipality, of any *road*, *street*, or *bridge*, the construction and maintenance of which would be advantageous to such municipality.

A loan raised by a municipality legally qualified to effect it as above for any one of the objects mentioned, must be effected by a by-law, in which the object to which the sum or the several objects to which different parts of such sum to be borrowed, is or are to be appropriated, must be clearly defined, and in which it must be recited that such loan is to be raised under the provisions of the above Acts, and the exact *term* for which such loan is to be effected must be expressed, but such term shall in no case be more than thirty nor less than five years.

Every such by-law or every material provision thereof shall be published for the information of the ratepayers, for at least one month before the final passing thereof, in some newspaper published weekly or oftener within the territorial jurisdiction of the municipality, or, if there be no such newspaper published within such jurisdiction, then in some newspaper published in the place nearest to such jurisdiction, and also by posting the same up in at least four public places in the municipality, (and if it be a by-law of a county council, then in each municipality in such county,) with a notice, signed by the clerk of the municipality in the council of which the by-law originated, signifying that it is a true copy of a by-law which will be taken into consideration by the council of the municipality after the expiration of one month from the first publication thereof in such newspapers, (the date of which first publication shall be mentioned in such notice,) and that on some day and at some hour and place, (or if the meeting be for a county by-law, places,) named in the notice, and which shall have been previously fixed by the said council, such day not being less than three weeks, nor more than four weeks, after such first publication. A general meeting of the qualified municipal electors of the municipality, (or of the several municipalities within the county,) will be held for the purpose of considering such by-law, and approving or disapproving the same.

If such by-law be approved by the electors at such general meeting, and be afterwards passed by the municipal council, then such by-law, and all the provisions thereof, shall be subject to the approval of the Governor in Council, and shall have no force until such approval shall have been given. Every such by-law when submitted to the Governor in Council for his approval shall contain a recital that it has been approved by a majority of the duly qualified electors (or of the municipalities) of (or in) the municipality, at a meeting (or meetings) called and held in conformity to the requirements of the above Acts, and such recital shall be conclusive proof of the facts therein stated.

Before any such by-law shall be approved by the Governor in Council, the treasurer of the municipality shall furnish a statement certified under oath, showing the amount of taxable property therein, according to the then last assessment roll or rolls, and a true account of all the debts and liabilities of the municipality and of its expenditure for every purpose for the then last year.

No municipality shall pass a by-law for effecting any loan as above for an amount exceeding twenty per cent on the aggregate valuation of the property affected by such by-law in the municipality, according to the then last assessment roll thereof.

PATENTS OF INVENTION.

Application for such patent should be made by petition to the Governor of Canada, accompanied by a solemn declaration made before a justice of the peace that the applicant verily believes himself to be the true inventor of the discovery or invention for which he so solicits a patent.

The petitioner must also deliver a written description or specification in duplicate of his invention or improvement, and of the manner or process of compounding the same, in such full, clear, and exact terms as to distinguish the same from all other things before known, and to enable any person skilled in the art or science of which it is a branch, or with which it is most nearly connected, to make, compound, and use the same; and in the case of any machine, he shall fully explain the principle and the several modes in which he has contemplated the application of that principle or character, by which it may be distinguished from other inventions; and shall accompany the whole with drawings and written references made in duplicate, where the nature of the case admits of drawing, or with specimens of the ingredients, or of the composition of matter, sufficient in quantity for the purpose of experiment; which description or specification shall be signed by himself, and attested by two witnesses.

The following forms are in conformity to the above statutes:—

PREVENTION OF ACCIDENTS ON RAILWAYS.

The 20 Vict., cap. 12, authorises the Governor in Council to appoint Inspectors of Railways, not more than three in number, who may enter upon and examine railways, stations and their appurtenances. Every railway company shall afford to such Inspectors every requisite information, and shall submit to them all plans, &c., of the construction of such railway or any portion thereof. No railway is to be opened for use by the public until a calendar month after notice in writing of the intention of opening it being given to the Board of Railway Commissioners, under a penalty of £50 for every day such railway shall so remain open. The Railway Commissioners, upon the report of an Inspector and approval thereof by the Governor in Council, may order the postponement of the opening of a railway; and any company acting in contravention to such order will incur a penalty of £50 for every day they shall so act. The Governor may order permanent bridges to be substituted for moveable bridges; and any bridges, tunnels, locomotives or cars condemned, on the report of an Inspector, by the Board of Railway Commissioners, with the approval of the Governor in Council, must be made sufficient by the company. The Inspectors are authorized to forbid the running of trains on railways deemed dangerous, until put in proper order; but the Railway Commissioners, with the approval of the Governor in Council, may modify such order of the Inspectors. Every railway company must use the best apparatus for communication between conductors and engine drivers, and for stopping or disconnecting cars, fixing seats therein, &c. In cases of serious accidents to or upon any railway, the company shall give notice thereof to the Board of Railway Commissioners, in default of which they shall forfeit £50 for every day of such omission; and every Railway Company shall semi-annually make a return to the above Board of all accidents and casualties (whether to life or property) that occurred on their railway during the previous half year, and a true copy of their existing by-laws.

Horses and cattle are by the above Act forbidden to be at large upon any highway within half a mile of its intersection with a railway.

Every railway shall pay an annual rate not to exceed £2 10s per mile, as fixed by the Governor in Council, to form "The Railway Inspection Fund."

INSPECTION OF STEAMBOATS, AND SECURITY OF LIVES OF PASSENGERS THEREON.

14 and 15 Vict., cap. 126.

The Governor in Council is authorized by this Act to appoint Inspectors of Steamboats for various parts of the Province; and all owners of such vessels are thereby required to have their machinery inspected at least once in every six months, under a penalty of £100 for negligence in that respect; also to have in a conspicuous and easily accessible place in every such steam vessel a steam guage, properly constructed, open to the view of all passengers, and shewing at all times the true pressure of the steam in the boiler thereof, under a penalty of £50 for every failure to do so.

It is thereby also made the duty of the owner and master of every such steamboat not exceeding two hundred tons, to provide and carry with such boat, upon each and every voyage, two long boats or yawls, each of which shall be competent to carry at least twenty persons, and, where the tonnage of such steamboat exceeds two hundred tons, not less than three long-boats or yawls of the same or larger dimensions, under a penalty of £50 for every failure so to do; and further, every such owner or master is required to provide, as a part of the necessary furniture, a suction hose and fire engine and hose, suitable to be worked on such vessel in case of fire, and carry the same on each and every voyage, in good order; and on failure thereof, each owner or master shall forfeit £50 for every such offence.

Any damage sustained in consequence of the non-observance of any of the provisions contained in the above Act, shall in all courts of justice be deemed, in the absence of proof to the contrary, to have been caused by wilful default of the master or other person having charge of such steamboat; and the owner thereof in all civil proceedings, and such master or other person in all proceedings, whether civil or criminal, shall be subject to the legal consequences of such default.

16 Vict., cap. 167.

This Act further provides that at least one of the boats provided for and carried with every such steamboat under the 14 and 15 Vict., cap. 126, shall be a LIFE-BOAT made of metal, fire-proof, and in all respects a good, substantial, safe sea-boat, capable of sustaining, inside and outside, fifty persons, with life-lines attached to the gunwale at suitable distances, and that all of such boats shall be well furnished with oars and other necessary apparatus, and shall be good substantial and safe boats, and in good condition at all times for service.

That it shall also be the duty of the owner and master of every such steamboat, to provide and carry with it upon each and every voyage, a good life preserver, made of suitable material, or a float well adapted to the purpose, for each and every passenger, which life preservers and boats shall always be kept in convenient and accessible places in such steamboats, and in readiness for the use of the passengers; and also at least twenty-five fire-buckets and five axes.

That every such steamboat carrying passengers on the main or lower deck, shall be provided with sufficient means convenient to such passengers for their escape to the upper deck, in case of fire or other accident endangering life.

That the Governor in Council may by Order in Council prescribe and regulate the number of passengers that may be carried by any steamboat; such order to be published at least twice, at an interval of at least six days between each publication, in the *Canada Gazette*.

(No such order has yet been published.)

20 Vict., cap. 34.

This Act subjects steam vessels to a closer inspection than that required by the previous Acts.

Every Inspector may examine any steamer at the place for which he is appointed; and if he considers such vessel unsafe or unfit to carry passengers, he shall report thereon, to the Governor in Council, who may by Order in Council direct that such vessel shall not be used or run until permitted so to do by the Inspector who shall have made such report, or by Order of the Governor in Council; and any such vessel run or used in contravention of any such Order in Council, shall be liable to forfeiture and to seizure by the collector of customs at any port, and to sale, in the same way as goods liable to forfeiture for non-payment of duties.

Inspectors may ask all pertinent questions of persons on board any steamer; and any person refusing to answer, or answering falsely, shall be liable to a penalty of £10.

Every Inspector is to see that the safety valves are sufficient, and may if he think fit lock up and take them from control of the crew. Steam guages are to be constructed and placed as Inspectors shall see fit, but open to the view of all persons on board. The master or owner of every such steam vessel is bound, under a penalty of £50, to report to one of the Inspectors any injury to vessel or machinery, within 48 hours of its occurrence.

To create "The Steamboat Inspection Fund" there shall be paid to a collector of customs at some port yearly, on every steam vessel a rate, to be fixed by the Governor in Council, not exceeding 6d. for every ton of measurement, and the following fees for every inspection:

For every propeller, freight or tug steamer, and every ferry steamer not exceeding 100 tons..	£1	5	0
For every ferry or passenger steamer over 100 tons	2	10	0

Collectors of Customs may demand the exhibition of receipts and certificates appertaining to any steam vessel, and may detain such steam vessel until such are produced, and until penalties incurred are paid.

By other provisions of this Act contained in the 1st, 2d, 3d, and 4th sections, which will come into force on the 1*st April* 1858, Inspectors of Steamboats are required to examine and see that suitable and safe provisions are made throughout such vessels to guard against loss or danger from fire; and to grant no certificate, if the provisions for preventing fires are not complied with, or if any combustible material liable to take fire from heated iron, or any other heat generated on board of such vessels in and about the boilers, pipes or machinery, shall be placed at less than 18 inches from such substance likely to cause ignition, unless a column of air or water intervenes between such heated surface and any wood or other combustible material so exposed, sufficient at all times and under all circumstances to prevent ignition; and when wood is so exposed to ignition, it shall be shielded by some incombustible material, so as to let the air circulate freely between such material and the wood.

Every steam vessel carrying passengers shall not have less than 3 double-acting forcing pumps, with chamber at least 4 inches in diameter, 2 to be worked by hand, and one by steam, if steam can be employed, otherwise all 3 by hand, one near the stern, one near the stem, and one amidships, each having hose of at least two thirds the length of the vessel, kept at all times in perfect order and ready for immediate use. Each pump shall also be supplied with water by a pipe passing through the side of the vessel, so low as to be at all times in the water when the vessel is afloat. But in vessels not exceeding 200 tons measurement, engine-room included, two of such pumps, one of which may be the steam-pump, may be dispensed with; and in vessels of over 200 tons and not exceeding 500 tons measurement, engine-room included, one of such hand-pumps may be dispensed with, but the hose must be long enough to reach every part of the vessel.

Inspectors may, whenever they deem it necessary, at least once in every year, subject the boilers of steam vessels inspected to a test by hydrostatic pressure, the limit of which shall in no case exceed 150 pounds to the square inch, and shall satisfy themselves, by examination and experimental trials, that such boilers are well made of good and suitable material; and the owner of the vessel shall provide the necessary pump and apparatus for such test, to be worked by the crew of the vessel; and no such Inspector shall make or deliver to the owner or master of any steam vessel a certificate without such boilers having been subjected to such test by hydrostatic pressure.

In subjecting boilers to such hydrostatic test, the Inspectors shall assume 100 pounds to the square inch as the maximum pressure allowable as a working power for a new boiler 42 inches in diameter, made of the best refined iron, and at least one quarter of an inch thick; and shall rate the working power of all boilers according to this standard; and in all cases the test applied shall exceed the working power allowed in the ratio of 150 to 100 lbs., using the water in such tests at a temperature not exceeding 60° Fahrenheit; but any such Inspector may, for reasons to be stated specifically in his certificate, fix the working pressure of such boiler at less than two thirds of said test pressure; and no boiler hereafter made shall be rated in its working pressure above the aforesaid standard.

PROVINCIAL CURRENCY.

It having been decided by the Provincial Government that in future the Public Accounts shall be kept in dollars and cents, the following Tables may prove useful:

To reduce Currency into Dollars and Cents.—Reduce the sum to sixpences and add to the result a cipher, if there be no odd pence in the sum to be reduced, or the equivalent in cents of the number of odd pence if there be any, as per Table 2.

To reduce Dollars and Cents into Currency.—Take away the right hand figure; if it be a cypher, disregard it; if it be a substantive figure reduce it to pence, as per Table 2; the sum when the right hand figure is removed, will consist of sixpences.

ALPHABETICAL LIST OF BANKS IN CANADA.

The Banks of Canada have been judiciously managed: the Stocks yield high average returns, and afford a most safe and favorable investment to the Capitalist. * * * * The business of banking has been so prudently managed that there never yet has been a stoppage of a Canadian Bank.—*Morris's Prize Essay on Canada.*

LAW [SOCIETY OF UPPER] CANADA.

The Law Society of Upper Canada was first established in 1797 by the 37 Geo. III., cap. 13, which enabled the Practitioners of the Law to form themselves into a society, and make rules for its government, under the inspection of the judges as visitors. The Act of 1822 (2 Geo. IV. cap. 5) incorporated the "Treasurer and Benchers of the Law Society,' giving a perpetual succession and a common seal, in the usual manner of Acts of Incorporation.

Under these statutes the Society is governed by the Board of Benchers much in the same manner as the Inns of Court in London, England. The Benchers sit in Convocation every Term and admit Students and Barristers. The examination for Students, which is a Scholastic Examination, is conducted in the presence of the Benchers; and the examination of Barristers at the end of the term of five years after admission, is conducted by the Benchers in Convocation. This examination is in the various branches of legal learning. Each student on admission is a member of the Society and entitled to the use of the library. The revenue of the Society consists of the fees paid by Students and Barristers on their admission, and the fees, called Term fees, charged to practising Barristers. By an agreement with the Government, the Society furnish the Superior Courts with suitable accommodation for ever for the sum of £6000 currency. The library of the Society is of considerable value, and is of great service to the students and practitioners. The treasurer is elected annually in Michaelmas Term, and enters upon his duties on the first day of the following term.

THE BAR OF LOWER CANADA.

The first public Act relating to the profession of the Law in Canada, was the Ordinance of Quebec (25 George III. cap. 4), passed in 1785, providing that "for the welfare and tranquillity of families, and the peace of individuals," no person should thereafter be called to the bar unless such as had regularly studied for the profession, and been "examined by some of the first and most able Barristers, in the presence of the Chief Justice, and two or more Judges of the Court of Common Pleas." This Act was amended by the 6 William IV. cap. 16, and continued in force in Lower Canada until 1849. In this year, a more complete measure was embodied in the Act 12 Victoria, cap. 46, which, after reciting that the profession of the law should be exercised "only by persons capable of performing the duties thereof with honor and integrity," incorporates all Advocates, Barristers, Attorneys, Solicitors, and Proctors at Law in Lower Canada, duly admitted as such before the 30th of May, 1849, under the name of *The Bar of Lower Canada*.

The corporation of the Bar is divided into four sections; namely, one for each of the Districts of Montreal, Quebec, Three Rivers, and St. Francis. Each section of which is known under the name of "*The Bar of Lower Canada, section of the District of* ——," and is composed of all Advocates, Barristers, Attorneys, Solicitors, and Proctors at Law in each district. The powers conferred on the corporation are exercised by a General Council, composed of all the officers and members of the Councils of the section. The General Council holds its meetings yearly, in Montreal and Quebec alternately, within six months after the election of the officers of the sections, and appoints, from among its members, a President, Secretary, and Treasurer.

The officers of each section are: *Bâtonier*, Syndic, Treasurer, Secretary, and eight other members: except in the District of Three Rivers, where only three other members are required.

Each Council of sections of the Bar has power to pronounce a censure or reprimand, through the *Bâtonier*, against any member who may become guilty of any breach of discipline, or of any action derogatory to the honor of the Bar; and if necessary, to punish such member, by suspending him from his functions for any period not exceeding one year; also, to prevent, hear, and determine all complaints and claims made by third parties against any member of the Bar, in matters connected with their professional duties. The whole is subject to the approval of the General Council.

There is no distinction in Lower Canada between Barristers and Attorneys. The two branches of the profession are combined, instead of separated, as in Upper Canada; and all admissions to practise, and regulations affecting the legal profession, are entrusted to the society of its members.

For Lower Canada ..... Richard Nettle, Quebec. | Upper Canada ..... John McCuaig, Hamilton.

GENERAL TERRITORIAL DESCRIPTIONS, &c.

CLERGY AND SCHOOL LANDS.

These Lands, which were set apart as Clergy Reserves in Lower Canada, in virtue of the Imperial Statute 31 Geo. III. chap. 31, consisted originally of the seventh part of the Townships surveyed prior to May, 1842, and were in most cases uniformly distributed over each Township. They are therefore limited to the older Townships, differing in that respect from the vacant surveyed Crown Lands. Since that time they have been finally secularized, and their disposal regulated by the Provincial Act 18 Vict. chap. 2.

Clergy Reserves remaining unsold in Lower Canada, December 31, 1856						487,683 acres.
Do.	do.	do.	do.	Upper Canada,	do.	do. 422,944 "
Total						910,627 "

A million of acres of land in Upper Canada were appropriated by the Act 12 Vict. chap. 200 as a Common Fund for the maintainance of Public Schools, and classed under two heads of account, viz., Grammar School and Common School Lands. 39,137 acres only of this large grant now remain undisposed of. The sale of the 960,863 acres realized the sum of $516,097.25.

JESUITS' ESTATES.

These consist of six large Seigniories and one large Fief, besides several small Fiefs and Rotures and other property in the City of Quebec, being the Estates held by the order of Jesuits in this Province, prior to the cession of it to Great Britain; amounting in extent to 795,362 arpents (equal to acres), of which 362,048 have been conceded, subject to the usual Seigniorial dues.

During the year 1856 the gross amount of receipts on account of these Estates was	$19,319 52
The charges for management, surveys, &c	3,240 77
Leaving a net revenue of	$16,078 75

The whole of the funds that have accrued, or that may in future accrue, from these Estates, are appropriated, by Act of the Provincial Legislature of last year, to educational purposes in Lower Canada.

CROWN DOMAIN.

This consists of certain Fiefs in the City of Quebec and Town of Three Rivers, whereof the censitaires hold immediately under the Crown: certain wharves in Quebec; all the beaches and water lots upon navigable rivers; and in general all Seigniorial Estates and rights held by the King of France prior to the cession of the Province to Great Britain.

During the year 1856 the gross amount of receipts was	$8,599 72
The charges for management, &c	$3,276 24
Leaving a net revenue of	$5,323 48

Note.—The cost of management for the same year was considerably increased by expenses in the preparation of documents required for the Seigniorial Commission.

SEIGNIORY OF LAUZON.

This is situated immmediately opposite the City of Quebec, and contains an area of 218,880 acres; the chief part of which was long ago conceded under Seigniorial tenure.

During the year 1856, the gross amount of receipts was	$18,646 93
The charges for management, &c	6,194 56
Leaving a net revenue of	$12,452 37

Note.—A great part of the expense of management for this period was for a re-survey of the Seigniory.

MINING LOCATIONS.

At present these locations are confined to the shores of Lakes Superior and Huron, and to the Islands to be found in those waters. It appears that from the year 1846, when licenses to explore were first granted by the Government, to the close of 1856, 78 such licenses were issued. By the existing regulations, any person, on payment of $100, can obtain a license to explore for minerals in any locality he may desire. The license remains in force for two years, and authorizes the holder to select and take possession of a tract not exceeding 400 acres, to be paid for at the rate of $1.50 an acre at the expiration of two years. The Government proposes that a cursory exploration should be made of the country bordering on Lake Superior, for the purpose of ascertaining the most favorable sites for commencing a series of similar surveys, with the design of developing its mineral resources and its lands fit for settlement, which, since the opening of the Sault Ste. Marie Canal, have become of increased value and importance.

Of the 78 Location Tickets issued, 68 are for tracts of 6400 acres and 10 for tracts of 400 acres each; total 10,400 acres.

During the year 1856 the gross receipts, consisting of payments for licenses and of instalments on locations purchased, were	$25,809 60
Deduct charges	4,300 00
Leaving a net revenue of	$21,509 60

RED RIVER AND SASKATCHEWAN COUNTRY.

This immense territory has for a long period been under the exclusive control of the Hudson's Bay Company, but, it is asserted, without any legal title, it being alleged that this is a part of Canada, as ceded by France in 1763, and not a part of the Company's territory under their charter of 1670. The company's lease of the "Indian Territories," beyond the Saskatchewan, granted in 1838, expires in 1859, and they are now endeavouring to obtain its renewal. Hence the attention of the Imperial and Provincial Governments has been directed to the subject; the latter accrediting a special agent to England to present before a Committee of the House of Commons the just claims of the Province. They have submitted their report to the House, upon which, however, no decisive action has yet been taken by the Imperial Government; but a hope may reasonably be entertained that the ultimate decision will satisfy the just claims both of the Province and the Hudson's Bay Company, and promote the interests of civilization necessarily to be affected under any circumstances.

The extreme length of this territory, from the Lake of the Woods westward to the Rocky Mountains, is about 900 miles, and its breadth, from the northern boundary of the United States to the mouth of Peace River, about 700 miles, presenting an area of nearly 500,000 superficial miles. It differs materially from the other sections of British America in several features. Immense stretches of prairie land are scattered throughout the territory, while along the banks of the streams there are groves of timber, and extensive wooded tracts on the upper waters of the Saskatchewan River.

This territory, though forming but one fifth part of that heretofore rendered available for the purpose of hunting only, exceeds the empires of France and Austria added together. The isothermal position of the greater part of it resembles that of Poland.

From the boundary of the United States, northward, it is navigable to Lake Winipeg, which, at about 250 miles, receives on the west side the Saskatchawan, a river 1300 miles in length. Excepting for twenty miles from its mouth upwards, where it is obstructed by rapids, this great river is navigated by bateaux without interruption for about 1000 miles, to Fort Edmonton, near the base of the Rocky Mountains. At 300 miles from Lake Winipeg, the Saskatchawan divides into two branches, each about 1000 miles in length and both navigable.

The Red River, Lake Winipeg, and the Saskatchewan therefore present an inland navigation of at least 1300 miles, commencing only 350 miles from Lake Superior and terminating at but very little over 500 miles from the Pacific, and very near the head waters of the River Columbia.

Immense coal fields are said to extend across the territory near the base of the Rocky Mountains. A great variety of climate, soil, and surface is presented in the country; and the rivers, lakes and bowels of the earth team with a varied wealth. All that is wanted is the presence of civilized man to turn them to account and give them value. In the western section the winters are both short and mild, the Indians having great numbers of horses which find their living out of doors all winter. The Red River, which falls into Lake Winipeg, is stated to be navigable for good sized steamboats far into the Territory of Minnesota, United States. Sir Alexander Mackenzie states that the country "abounds in beaver, moose deer, fallow deer, elks, bears, buffaloes," &c. The majority of authorities, in describing this region, concur in opinion as to its size, its value, its fertility, and its fitness every way for settlement; and little doubt exists, that, as soon as it is opened up, the immigration will flow towards the valleys of the Red, Saskatchewan, and Kaministiquoia Rivers, and form, at no distant day, another young giant among the British Colonies of North America.

CROWN LANDS IN GENERAL.

Total of Public Lands surveyed, unsurveyed, and conceded, lying within and comprising the area or valley of the St. Lawrence and its tributaries, on 31st December 1856.

Number of acres of surveyed Public Lands remaining undisposed of	6,732,219¾
Of unsurveyed Public Lands	168,845,455
Total undisposed of	175,577,674¾
Add private or conceded Lands	36,441,525¼
Making in the area of the portion of Canada that is drained by the River St. Lawrence and its tributaries a total acreage of at least	212,019,200 acres.

The vacant surveyed Crown Lands in Lower Canada lie chiefly on the north side of the St. Lawrence in the valley of the River Saguenay, in rear of the Seigniories,—on the Ottawa and its tributaries—and between the Seigniories on the south side of the St. Lawrence and the Province line;—a comparatively small portion only remaining in that part of the Province known as the Eastern Townships.

The Peninsula of Gaspé, which lies between the St. Lawrence to the north and the Baie des Chaleurs and River Ristigouche to the south, is 175 miles in length by 90 miles in breadth, and contains 11,800 superficial miles. The land in this section is of a light description, being broken by several ranges of mountains, with occasional belts of arable land at their base. The mountains in some parts of this Peninsula are 3,500 feet in height, and wheat has been grown at an elevation of 1000 feet. Along the shore of Baie des Chaleurs there is a tract of land 50 miles in length by 10 miles in breadth, of a rich description, and well settled in front. The peninsula in the interior is well watered, the rivers being remarkable for their volume. As this section of the Province was considered by Government out of the way of immigration, it has not been thought necessary to survey more of the Public lands than were calculated to supply *the growing population of the locality*.

Another extensive unoccupied section of the Lower Province is the County of Tadousac, having a coast on the Gulf and the River St. Lawrence of 600 miles in length, with a breadth of 160 miles, containing about 65,000 square miles. The interior of this region is very little known, but it is said that in its general features it resembles the kingdom of Norway, being rugged in outline, but interspersed with fertile valleys, traversed by large rivers, covered by immense forests, and possessed of inexhaustible fisheries. Very little of it has been surveyed

The valley drained by the River Saguenay is of a triangular form. It includes an area of 27,000 square miles, being equal in extent to the European countries of Tyrol and Switzerland taken together. It is estimated to contain about three million of acres of land fit for cultivation, lying chiefly in the interior basin known as the Upper Saguenay. Notwithstanding the rugged and unpromising aspect of much of the country, as seen from the river and the Lake Kenogami, the richness of the soil of the interior basin of the Saguenay, on the high plateaux, as well as in the valleys between the rocky ranges of hills, is remarkable; and still more so on the low lands by the streams and lakes, where it is, generally, a rich clay loam, with retentive subsoil at a suitable depth, which will ensure its durability.

The next territory of importance is that drained by the River St. Maurice, having an area of 21,000 square miles. The number of acres in this section of the Lower Province considered fit for settlement is estimated at three and a half millions. It is magnificently wooded with white pine timber of great size. The marked features in the physical outlines of this region are the numerous large rivers and lakes with which it is watered, the extensive internal alluvial lands that lie on the banks, the wide belts of white pine timber, the extensive beds of bog or swamp iron ores of superior quality, and (after passing the Laurentide range) the absence of any mountainous ranges. The Rivers Bastonais, Mekinak, Croche, Flamande, Rat, Wessoneau, Vermillion and Shawenegan, offer the best soils for the settler. The whole territory is intersected by magnificent rivers, with forests of pine alternating with hardwood tracts, while iron ore exists in unlimited quantities; thus containing within its boundaries all the elements of future prosperity and greatness.

The country on the south side of the St. Lawrence, from the River Chaudière and Kennebec Road to Metis, contains a considerable quantity of vacant Public Lands. Within it, between the rear of the Seigniories on the St. Lawrence and the southern boundary of the Province, there is a tract of country 200 miles in length and varying from twelve to forty miles in width. There are 1,048,400 acres of surveyed lands undisposed of, and 1,187,000 acres unsurveyed.

In the Eastern Townships section of Canada there are about 981,951 acres of surveyed Crown and Clergy Lands undisposed of, and 250,000 acres of unsurveyed land, in all 1,231,951. The value of the lands in this section has been much enhanced lately by the passing of the St. Lawrence and Atlantic and the Quebec and Richmond Railroads through the valley, and the opening up of several important roads, which have given the settlers an outlet to market.

The valley or basin drained by the River Ottawa is about 77,000 superficial miles in area. The country lying between the Ottawa and Lake Huron is the most valuable part of this section of the Province. The different descriptions of timber which are more or less mingled on the north-east side prevail separately in particular tracts on the south-west side, indicating a difference of character in the separate parts. For instance, the white pine country contains the finest forests, interspersed with tracts of hardwood land, stretching a hundred miles from north to south, with a width varying from forty-five to twenty miles. It includes the counties of Carleton, Lanark and Renfrew, with a population of 80,000. Westward lies the red pine country, a hundred and thirty miles in length and from fifty to twenty in breadth. Though the soil of this division is generally poor, more or less gravelly or stony, and in parts extremely rugged and rocky, yet there are between the Rivers Bonnechère and Madawaska tracts of hardwood land of a rich deep loam, with maple, basswood and elm, of an exceedingly tall and heavy growth, and cedar swamps valuable for the richness of their soil and the superior fencing timber they afford. The third natural division of the country west of the Ottawa is the hardwood country, a tract about 75 miles in width and 130 in extreme length, comprising an area of upwards of 7000 superficial miles.

The country on both sides of the Ottawa, and especially south of it, has a summer for agricultural labor upwards of a month longer than that of the District of Quebec; and fall wheat, which is better in quality and yields about twenty per cent more than spring wheat, is successfully cultivated as far as settlement has yet extended. The climate 200 miles above Ottawa seems to continue equally favorable; and considering that for many years past the lumber trade has given the settlers high prices for their produce, and with a market on the spot, it will be at once apparent that the Ottawa country is the most advantageous part of the Province where Government has still any considerable extent of land to dispose of.

The surveyed Crown Lands remaining undisposed of in Upper Canada are almost altogether included in the Counties of Lanark and Renfrew, Frontenac, Lennox and Addington, Hastings, Victoria and Peterborough,—that is to say, in the valley of the Ottawa, and in the rear of the settled country on the north side of Lake Ontario, there being but a very few vacant Crown lots now left in the western part of that section of the Province.

In proximity to the northern waters of Lake Ontario there are about 244,000 acres of Crown lands undisposed of, chiefly in the rear townships, and 175,000 acres of Clergy Reserves.

In the Western Peninsula there are only 24,497 acres of Crown lands and 115,000 acres of Clergy lands undisposed of, to which may be added 42,760 acres of land formerly at the disposal of Colonel Talbot, but now in the market. There are no unsurveyed lands in this Peninsula.

The Huron and Superior territory is the last section of the Province within the valley of the St. Lawrence and the Lakes. Its length is 410 miles, with a supposed breadth northward of 160 miles, and an area of 48,000 superficial miles, with a coast of 600 miles. In the Superior territory, lands on the west part of the lake coast, amounting to 590,086 acres, have been reserved for the Indians resident in the territory, while the total number of these Indians, from the lake back to the height of land, only amount to 2,521.

The Canadian shores of Lake Superior present a bold and rocky coast, diversified in the character of its scenery, in accordance with the distribution of its different geological formations; cliffs and eminences rising at to heights varying from 300 to 1300 feet, close upon its margin, and this, deeply indented in some parts with extensive bays and in others presenting clusters of islands, is in many places carried out in well sheltered coves, affording innumerable harbors of a safe and commodious character, destined greatly to facilitate whatever commerce may hereafter be established on the lake, whether in the produce of its mines or its fisheries. The valley of Spanish River, an important northern tributary of Lake Huron, presents peculiar facilities for colonization: the land is generally of a good quality, and where it is otherwise it abounds with pine timber.

These several sections taken together contain a great extent of vacant Public Lands fit for settlement, within the valley of the St. Lawrence and its Lakes; say—

Vacant Crown Lands surveyed in Lower Canada	4,797,550	acres.
Do. do. do. Upper Canada	830,398	"
Total	5,627,948	"

Some of the sections, as has been shewn, present many important advantages in quality of soil, position and natural resources; while public works, and improved means of communication by land and water, have materially increased the value of them to the settler.

MAP OF THE PROVINCE.

The Maps of the Province hitherto published have more or less become obsolete. A Map is now in preparation for the Crown Lands Department on the scale of two miles to an inch, into which nothing will be introduced that has not been determined by survey, leaving the unsurveyed parts blank on the plates of the map, to be added as surveys advance.

For the more ordinary purposes for which a Map of the Province is required, an edition of it is also in course of preparation on the scale of 12 miles to an inch.

SALE AND MANAGEMENT OF PUBLIC LANDS.

LAND AGENCIES.

By a recently established system, payments for public lands are made into the Banks entrusted with the custody of public monies.

There is shortly to be carried into effect a new system of land agencies. A few large circuits or land districts are to be substituted instead of the present numerous local land agencies; these districts to be visited in rotation by travelling agents attached to this Department.

These alterations have been rendered necessary by the abuses of the old system, and will in future prevent the loss to the public and inconvenience to individuals which occured thereunder.

It is only necessary here to notice, that under the old system the agents were insufficiently remunerated; who in very many cases withheld information from intending purchasers, referring them to third parties under pretence of a prior sale, and realizing a bonus for themselves by the practice.

Six or eight travelling agents are proposed to be substituted for the present number of local agents. These agents will be paid, not by commission, but by fixed salaries. Besides the mere sale of lands and the collections to be made, it will be the duty of these officers to interest and identify themselves thoroughly with the colonization and settlement of the country, by keeping up such communications as may be necessary to place the advantages of their respective sections, and the lands for sale there, constantly before the public eye.

The sections are to be visited by the several agents in succession, none visiting the same section twice consecutively; thus adopting as far as practicable that system of rotation which is found so advantageous in the military and ecclesiastical services.

CLAIMS FOR DEFICIENCIES.

Claims against Government for deficiencies in the actual quantities of lands granted, however long ago and of however little value when granted, can now be made good; the claimants obtaining in compensation lands equivalent to the deficiencies estimated at what their present value would be.

It is proposed in future to restrict this right to a period of five years from the date of the grant, in consequence of the undue encouragement the present system affords for the exercise of ingenuity in searching up and exaggerating claims that otherwise would never have been raised.

LUMBER TRADE.

WOODS AND FORESTS.

The Lumber Trade being one of the principal resources of Canada, the following particulars connected with the revenues accruing during the year 1856 from this branch of the Public lands, on account of licenses granted, timber cut, Government slides, and transactions of the Cullers' Department, will doubtless prove of much interest.

The timber agencies have been separated from the land agencies and consolidated into larger territorial divisions, to which agents at fixed salaries have been appointed, who are required to devote their whole time and energy to the due performance of their duties, instead of those duties being as before made objects of secondary importance to men who had to maintain themselves by other means—the abuses of the old system rendering this change necessary.

The timber cut consists of white and red pine, tamarac, oak, elm, birch, spruce, cedar and juniper, from which is produced square timber, saw logs, oars, shingles, staves, floats and rails, masts, and cord wood.

AN ABSTRACT of the Number of Pieces and Cubic Feet of each description of Timber measured at the Port of Quebec during the season of 1856.

The total experts of timber of all kinds from Canada, in the year 1856, amounted in value to $16,019,883; and the value of ships built in Quebec and sold out of the country amounted to $1,213,076: making a total of wood goods exported of $11,233,959.

Connected with the Woods and Forests,—the Provincial Timber Slides and the transactions of the Supervisor of Cullers Office Department will further illustrate the matter of the Crown Lands of Canada. The connection of both these branches with the management and superintendence of the Woods and Forests is essential no less to the general interests of trade than for the purpose of aiding in the collection of the revenue.

The Slides are, the Arnprior, Calumet, Chaudière, Chats, High Falls, Madawaska, Gatineau (Booms), Joachims, Portage du Fort, and the St. Maurice; which latter being of recent date, their details are not yet given in full.

During the year 1856 the gross receipts were,—

On account of Timber Licenses	$214,012 90	
Do. Government Slides	32,788 90	
		$246,801 80

In regard to the fisheries in the Gulf of St. Lawrence there is much to encourage the adoption of measures to augment the trade westward, particularly the employment of *steamers* to transport the produce in a short time to Quebec and Montreal. Fish is now brought almost daily from Portland by railway to the latter city, and even sometimes to the former—a course of trade that would seem to imply a great lack of enterprise in Canada. It has been objected that there is not a sufficient demand here to warrant any considerable increase of the supply, which is an erroneous view of the subject, since, were the public once to know that there existed a *regular* supply, the demand would become immeasurably extensive, and our laboring population, as in other countries, be abundantly supplied with an important staple of nutritious food.

The following Returns, prepared by J. LeBoutillier, Esq., M.P.P. for the County of Gaspé, are given with a view of showing, as far as any reliable information could be obtained for the purpose, the present trade of the Fisheries in the Gulf of St. Lawrence :—

It would appear from these details that the Fisheries of Canada are of vast importance, as yielding a staple of commerce and a useful article of domestic consumption in the localities where they can be profitably carried on within the settled parts of the Province. As settlement takes place on the Northern Shores of Lakes Huron and Superior, the fisheries there will grow in importance. It is, however, to be regretted, that the product of the salmon fisheries in the Lower Province has of late years been gradually decreasing, so much so as to render

it advisable to adopt the system of artificial fish breeding as a means of restoring them to their former fertility. The application of this system is simple; and as it has been attended with success in European countries, particularly in France, it might, under proper superintendence, be carried out with equal success in our rivers and lakes, from which, in some instances, that prized fish has disappeared.

In illustration of the value of the fisheries in the Gulf, it may be stated, that during the summer seasons six or seven hundred American schooners resort to its coasts to carry on various fisheries, especially that of mackerel. Besides these, from three to four hundred schooners from Nova Scotia and New Brunswick repair to the Magdalen Islands and the Canadian coast of Labrador, to carry on herring and cod fishing. To these may be added the six hundred resident seal fishers on the coast of Labrador, who take about 7000 seals annually.

The present yearly value of the fisheries prosecuted on the coasts of Canada is estimated at $1,600,000, which is a mere "drop in the bucket" compared with what it might be. From the three principal ports of the Gulf alone, the total value of fish exported amounted in 1856 to $327,690,72, against $315,278.05 in 1855: and the average annual exports from the Canadian coast of Labrador (including furs, seal skins, and oil) amount to nearly $150,000.

It is, therefore, very satisfactory to find that the Legislature, acting upon the suggestions of the Executive Government, have passed an Act providing for the superintendence of our valuable fisheries, and for the adoption of such measures as are calculated to arrest the evils threatened in regard to the decreasing product of the fisheries in the Province. One of the gentlemen nominated for this duty, Mr. Nettle, has, it is understood, already entered upon the active discharge of his important office.
